OUTDOOR

ALL SEASONS OUTDOOR

WELCOME

Welcome to the world of exquisite exterior design where functionality meets aesthetics. Skyline Outdoor Inc. re-designs outdoor living systems under the brand name of Pergola.

Step into the enchanting realm of pergolas, where outdoor living spaces are transformed into serene havens of comfort and style. A pergola, with its open framework of sturdy columns and gracefully arching beams, creates an inviting atmosphere that seamlessly blends nature with architecture.

SKYMAX

Skymax Bioclimatic Pergola remote controlled retractable aluminium louvres. 100% waterproof with LED lights around the roof.

With fully retractable roof provides you an open feeling, while keeping you covered under its shelter. You can slide the louvre blades on the roof open fully to enjoy the sunlight at its maximum.

SKYMAX interacts noiselessly with nature to offer you constant comfort in changing weather conditions, with minimum energy consumption. When completely closed, shades shelter the space against weather, dust and all unwanted environmental elements. With the products such as Zipscreen and Guillotine Glass, it could become a fully enclosed area perfect for use as a garage or workshop in your open space.

BEST FOR

Structure material & Practical Specifications

Water Drainage

ONLY SKYLOUNGE
TUBE LED

SKYLOUNGE & SKYMAX
Perimeter & RGB LED

The structures are made to move raindrops of the ceiling as fast as possible, other than standard slope that will cause water to slide down the structure also uses an embedded water draining system that connects the ceiling to the ground and does not let water to slide down from unwanted sections of the structure.

Control & Automation

We make sure our shading structures do what they are built to do when they are supposed to. Our pergolas can be equipped with sensors of light, wind and rain to change the settings according to the environmental factors automatically, we also have remote control systems to make your structure work at your will.

TELIS 4 and 16 RTS

Hand-held remote extends control of motorized products up to 4 and 16 different channels within 65 feet of range

DECOFLEX WIREFREE™ RTS

Battery-powered and a completely wireless wall switch

ONDEIS® WIREFREE RTS RAIN AND SUN SENSOR

Solar-powered combined rain and sun sensor. The Sensor is completely wireless and uses optical rain-sensing technology and a sun-level sensor

BUILD AND SEALING PROPERTIES

Multi-layered sealing system using several gaskets

Bioclimatic structures are designed to collect and keep the dust in a small chamber in order to prevent it from falling down when closing the ceiling. Bioclimatic panels also have the ability to completely seal the structures against water or air.

Panel and Gutter Integrated Sealing

The panels are able to rotate up to 120°

Special dust chamber on the panels

Structure Color and Finish

Our Pergolas utilize aluminium all over the structure to ensure lightness and strength at an optimum; however, you can cover the body and the columns with one of our many colours and finish choices as you can see below.

METAL FINISHES

RAL 9010 RAL 9006 RAL 1011 RAL 8016 RAL 7022 RAL 9005

SKYLOUNGE

Skylounge Bioclimatic Pergola rotating remote controlled aluminium louvers. 100% waterproof with LED lights on louvres .

Shades have been there for a long time, they have protected us from the sun and the rain, but there is one thing they could not do, and that is mastering the wind. On a hot summer day, having a cool breeze could mean between satisfaction and frustration, the same goes for under extreme sunshine where having the ability to adjust the sun's heat would change the experience significantly.

Skylounge takes an entirely different approach to create shades and shelter. The blades help to adjust the amount of sunshine and the direction of airflow to provide the complete freedom and best experience. When completely closed, shades shelter the space against weather, dust and all unwanted environmental elements.

BEST FOR

- Houses
- Verandas

ELEGANT

Elegant is high-end retractable PVC awning with aluminium structure in reasonable budget. 100% waterproof with LED lights on roof.

An elegant pergola serves not only as a stylish addition to your outdoor space but also as a functional one. It creates an inviting ambiance for various activities such as outdoor dining, social gatherings, or simply enjoying a peaceful retreat. Additionally, it can serve as a support for climbing plants such as vines or flowering creepers, adding a touch of natural beauty and fragrance to the surroundings.

Whether placed in a garden, patio, or backyard, an elegant pergola offers a timeless and sophisticated atmosphere, providing a perfect blend of form and function. It is an exquisite addition that enhances the overall aesthetic appeal of any outdoor space, making it a truly enchanting and memorable setting.

FIX GLASS ROOF

Skyline fixed double glazing glass roof comes with aluminium structure. 100% waterproof with spotlights on roof.

A fixed glass roof pergola is a type of outdoor structure that features a solid roof made of glass panels. Unlike traditional pergolas, which often have an open or latticed roof, a fixed glass roof pergola provides a fully enclosed and protected space while still allowing natural light to filter through.

Key features and benefits

- Weather protection
- Natural light
- Thermal control
- Aesthetics
- Customization options
- Low maintenance

BEST FOR

- Outdoor living space
- Garden Retreats
- Sunrooms
- Commercial Establishment
- Pool Enclosures

ZIP BLINDS

Zipblinds are typically made from durable and weather-resistant materials, such as high-quality fabrics or mesh, that are built to withstand various outdoor conditions. The blinds are custom-made to fit the dimensions of your pergola, ensuring a perfect and seamless integration with the structure.

The key feature of Zipblinds is their innovative zip-guided system. This system allows the blinds to be easily raised or lowered along vertical tracks that are installed on the sides of the pergola. The zippers on the blinds securely fasten them to the tracks, preventing any gaps and ensuring a tight and secure fit.

ADVANTAGES

- Not affected by high wind and other loads.
- As fewer fasteners are used, a more ergonomic image emerges.
- A system that can withstand harsh weather conditions.
- When the system is opened, the carrier profile does not appear.

Top box profile with LED lighting

New, interlocking design that does not require fasteners

MOTORISED WINDOWS

Motorized windows for a pergola are a convenient and versatile feature that adds functionality and comfort to your outdoor living space. These windows, also known as pergola screens or pergola shades, can be installed on the sides or roof of your pergola to create an enclosed or semi-enclosed area.

They provide protection from the elements, control over light and ventilation, and the ability to adapt to changing weather conditions with ease.

ADVANTAGES

- Total system opening-closing only one remote click.
- Not affected glass weight.
- Not affected by high wind.
- A product that can be used in every country with a globally recognized certificate.

SLIDING DOORS

Sliding glass for a pergola is a stylish and functional addition that brings a contemporary touch to your outdoor living space. These glass panels are designed to fit into the framework of your pergola and offer versatility in terms of opening and closing options.

They provide weather protection, natural light, and the flexibility to control the level of openness, allowing you to enjoy your pergola in various weather conditions and adapt to your preferred ambiance.

ADVANTAGES

- Customers can choose a suitable glass configuration for the ambient.
- Quickly opening and closing, easy movement that does not require much power.
- You can apply one of the lock systems on which side you want.
- It is not affected by high temperature difference.

FIXED GLASS

C-60 Fixed joinery is offered as an uninsulated series produced in our company. C-60 Fixed joinery can be produced as 8 mm, 10 mm and 20 mm. The required insulation is provided by using Internal and External Glass Wicks. In addition, C-60 fixed window provides thermal insulation up to four times depending on the type of Bora used. Our company offers C-60 fixed window systems with long-lasting and durable view to your use for many years.

C-60 Fixed - 8 mm

C-60 Fixed - 10 mm

C-60 Fixed - 20 mm

FIXED GLASS

Fixed window is a system designed and developed by our company to be integrated into the exposed triangle part of the Pergola. Fixed window can be produced in thicknesses of 8 mm, 10 mm, and 18 mm. It is a system that you can easily install by providing the necessary insulation with wicks and gaskets. With its slim and stylish design, your Pergolas will now be more flamboyant.
